## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-92 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1, 34, 66, 72, 78, 80, 85, 92, with the allowable features being: the first layer is electrically more conductive than the second layer(claims 1, 72, 78, 92); the first layer has a creep rate higher than the second layer(claims 34, 66); at least one of the electrical conductor layers has a width 50% or less than that of the width of the insulator(claim 80); the first layer has a stress gradient that is less than the first stress gradient(claim 85). Therefore claims 1-92 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Baker et al.(U.S. Patent No. 5,567,334) and Patel et al.(U.S. pat
